PROFESSIONAL EXPERIENCE

INFOSYS LIMITED
Systems Engineer

Bangalore, India
MAR 2022 - Present

Client - Goldman Sachs

- Working in a development team integral to Synthetic Products Group which generates **70% of the firm's revenue**.
- Fulfilled **20+ OKRs** in a year including enhancements to **core booking logic** resulting in elimination of 30% e-task noise and payment breaks as well as increase in timeliness and accuracy of bookings.
- Developed a **Java-Slang** integrated standalone utility that serves as a one-stop solution for all maintenance and support issues resulting in **50% reduction** of repetitive efforts.
- Identified and fixed bugs in legacy report system resulting in **5x better performance** with reduction in runtime from an average of 3 hours to less than 30 minutes, ensuring timely delivery of **critical financial reports**.
- Enhanced **Bookings UI** to provide better visibility of the state of bookings and their economics.
- Actively involved in booking and workflow support system.
- Recipient of Infosys '**Insta Awards**' for excellence in work, **twice** in a year.

SKILLS

- Java, Spring Boot, MongoDB, PostgreSQL, REST APIs
- Version Control – Concurrent Versions System (CVS), Git
